The Nobo Slimline Wi-Fi Panels offer the perfect choice for users who want to control the comfort in their space remotely, featuring built-in Wi-Fi and compatible with our Capa Connect APP*, these smart panels can be connected to your internet and controlled completely via your Smartphone or Tablet. These panels also offer highly intuitive user controls for easy, direct on-board basic operation of the heater. Over-the-air updates ensure your Wi-Fi panel always has the latest software**.

The Wi-Fi panels include a 7-day programmable user timer, with 7 time periods a day and come with 5 built in pre-set modes, Normal (Timer), Comfort, Eco, Away and Off, giving the user a greater depth of flexibility.

The Capa Connect APP allows you to effortlessly control multiple heating products using a single, user-friendly interface. Share access with family members and manage user permissions for ultimate control of your home's heating environment. Keep your devices secure with lock/unlock controls to prevent unauthorized adjustments to temperature settings. Design personalized heating schedules tailored to your lifestyle, ensuring maximum comfort and energy savings.

Need a sudden change? The manual override feature lets you quickly adapt to unexpected departures or early returns home. Organize your devices into sites and zones like "Bedrooms," streamlining management and enabling unique schedules for different areas. Capa Connect automatically keeps your devices up to date via Wi-Fi connectivity, ensuring consistent, optimal performance for your home heating system. Experience the future of home heating control with Capa Connect.

**Capa Connect available for free on Apple and Android stores.*

***A strong Wi-Fi signal is required in the panel's installation area, please assess the signal thoroughly before installing the product.*
